

Donald "Don" Clark

It is with great sadness that we announce the passing of "Don" Donald Bradshaw Clark P.E. Born in London England 9/7/1930- Passed Mission Viejo, Ca. 1/24/2014.

Don was instrumental in helping the Tortilla and Tortilla Chip Industry with setting many standards and innovations we still use today. With Don's engineering background he would take a project from pencil to the production floor and backed up everything he did with factual data. Some of the many projects he helped design were the Mach IV Oven, Die Cut, Single Pass and Frying lines.

In his youth Don was a member of the Royal Air Force cadets pilot training in England during WWII. Don kept his passion for flying as a hobby and working with Bill Lear of Learjet fame as well as undersea explorer Jacques Cousteau. Don also had many outside interest such as being a Judge at the California Science Fair. He was a longtime member of the National Society of Professional Engineers as well as the California Society of Professional Engineers (NSPE/CSPE)

Don was a gentleman from England who never lost his British etiquette. Don was not one to brag or boasted about his achievements. He was dedicated to his work til the end and was still consulting part-time until his passing. Don will be truly missed
